Beauty of Sight Empowers Surgeons Worldwide in Corneal Surgery Training

We're thrilled to share the success of our recent collaboration with Bascom Palmer Eye Institute during their Interactive Consultations in Cornea, Cataract, and Refractive Surgery course on

February 23rd. Beauty of Sight was pivotal in hosting wet labs and utilizing donated corneal tissue for surgical training.

These wet labs provided a unique opportunity for over 30 surgeons from across the globe to enhance their skills in DALK (Deep Anterior Lamellar Keratoplasty) and DMEK (Descemet Membrane Endothelial Keratoplasty) surgeries. Led by Bascom Palmer cornea specialists and esteemed colleagues, attendees engaged in hands-on learning, gaining valuable insights into cutting-edge techniques and best practices.

We sincerely thank the selfless eye donors who made this educational event possible. Their generosity has empowered surgeons worldwide to further their knowledge and expertise, benefiting countless needy patients.

Please donate today to support our programs, including our Gratis Corneal Tissue, Serum Tears Assistance, and Research programs!
